

Graduate Spotlight

My name is **August Howerton** and I attended PCC after graduating from high school. After two years at PCC, I earned my Associates Degree in Science and transferred to East Carolina University.

Due to the small class sizes, I was able to form personal relationships with my teachers. The teachers at PCC are one of a kind; caring, knowledgeable, and dedicated to their students. My favorite aspect about the teachers at PCC is that they will not rest until they know their students understand the material. Going to a community college for two years was the best option for me because it allowed me to become accustomed to college level work and the freedom associated with college, without the expenses of a four-year college or university.

The transfer process to ECU was extremely easy. PCCs dedicated advisors worked with me to make the transfer as painless and seamless as possible. It also helped that PCCs classes all transfer to universities and is easily verified through the NC Course Equivalency document.

Altogether, PCC was a wonderful stepping stone in preparing me for college life. If I had not gone to PCC, I would, without a doubt, not be able to handle the workload and liberty of college life. So, to those of you who are considering PCC as the next step in your education, I strongly urge you to go to community college. If it worked for me, it will undoubtedly work for others.

Night Classes for Spring 2018
